

ABC QUICK CHECK

A Basic Pre-Ride Safety Check

A is for Air

- Inflate tires to the pressure listed on the side of the tire
- Use a pressure gauge to insure proper pressure
- Check for damage on tire and replace if damaged

B is for Brakes

- Inspect pads for wear; replace if there is less than 1/8" of pad left
- Check pad adjustment; make sure they do not rub the tire
- Look to see that you can fit your thumb between the brake lever handlebar when the brakes are squeezed all the way

C is for Cranks & Chain

- Pull your cranks away from the bike – if they are loose, tighten the bolt
- Check that your chain is free of rust and gunk

Quick is for Quick Releases

- Make sure your quick releases are all closed
- They should all be pointing to the back of the bike, so that they don't get caught on anything

Check is for Check it Over

- Take a quick ride to check that your shifting and everything else is working properly

BIKE SAFETY TIPS

- Wear a helmet for every ride and use lights at night
- Always ride in the same direction as traffic
- At stop signs and driveways, look all ways for traffic before riding into the street
- Check your bike before every ride by using the ABC checklist
- Obey all traffic signs and lights
- Make sure other drivers see you. Be visible and make eye contact
- Always use hand signals when stopping or turning
- When riding with others, ride in a single file
